Abdalla Elhagar

Front-End Developer (React & Next)

(+20) 1129352754 | abdallaelhgar@gmail.com | linkedin.com/in/abdalla-elhgar | github.com/Abdalla-Elhagar

OBJECTIVE

Motivated Front-End Developer with strong skills in React.js, Redux, and modern web technologies, passionate about building responsive and user-friendly web applications. Seeking an opportunity to apply my technical knowledge and creativity in developing interactive interfaces and improving user experience. Recently developed ReBook, a social platform for exchanging used books, demonstrating skills in both frontend and backend development.

EXPERIENCE

Frontend Developer — Jul 2024 – Present
Freelancing Jobs

- Designed and developed responsive websites using React.js, Tailwind CSS, and JavaScript for clients.
- Delivered landing pages, portfolio sites, and small business websites optimized for performance and user experience.

Frontend React Developer — Sep 2024 – Dec 2024
*Internship at **Web Masters***

- Developed and maintained React-based web applications, improving load speed by 30%.
- Integrated TypeScript, Tailwind, Redux Toolkit, and MUI, enhancing UI performance and maintainability.
- **Certificate**

TECHNICAL SKILLS

Frontend: Next.js, React.js, Redux, Redux Toolkit, Bootstrap, Tailwind, Material-UI, Swiper, Framer-Motion, HTML, CSS, JavaScript, TypeScript, SASS.

Backend: Node.js, Express, MongoDB, nodemon, JWT, cors, bcrypt.

Other Technologies: Git & GitHub

PROJECTS

Next.js Portfolio — Personal Project

Architected and deployed a personal portfolio website using Next.js, designed to showcase projects, skills, and experience in a clean and interactive way. Integrated smooth animations with Framer Motion and a modern UI using Shadcn/UI and Tailwind CSS. Built with TypeScript for type safety and scalability. The portfolio is fully responsive, SEO-optimized, and designed for high performance and accessibility.

Technologies Used: Next.js, TypeScript, Tailwind CSS, Shadcn/UI, Framer Motion.

Exclusive — Internship Task

Developed an e-commerce platform called Exclusive as part of an internship task. The platform includes advanced features such as product browsing, category-based filtering, responsive layouts, and interactive sliders. Designed with a focus on performance, user experience, and clean UI architecture.

Technologies Used: React.js, TypeScript, Tailwind CSS, Swiper.js.

Rebook   Freelancing Project

ReBook is a social web application that enables users to share and exchange used books easily. Each user can create an account, add books they own, and manage their personal collection. Visitors can browse books by category, search by title, and view detailed information such as the book's name, condition, category, and the contact details of the book's owner.

Frontend: React.js, Redux, React Query, Tailwind, Typescript.

Backend: Node.js, Express.js, MongoDB, Mongoose, JWT, dotenv.
